

# Looking to turn your inventory into cash?

We can help you minimize cost and maximize **return!**

EOL enables businesses and organizations to recover the value in their excess or end of life technology assets such as handsets, wireless cards, routers, accessories or parts regardless the condition (new, refurbished, used, etc.). We securely destroy sensitive data, provide comprehensive asset tracking services and enable you to meet their legislative obligations for equipment disposal. We offer a strategic approach to recovery and tailor our services to individual clients, depending on asset value and your requirements. Recovered assets can be refurbished and reused or resold; dismantled and recycled or securely destroyed. Our experienced team will work with you to identify the most strategic method of recovery with the key aiming to recover the assets with minimal disruption, maximizing the value of return, whilst reducing your costs and liabilities.

## EOL Service Features and Benefits:

- Asset valuation and proposed recovery strategy
- Accurate timescales
- Certified buyers
- High security and controlled warehouse
- Asset registration, inventory audit and assessment
- Inventory sorting, testing, classification
- Content clearing (data wiping)
